## Responses Formats

Examples of URLs and the responses are available for XML and JSON formats as below:

### Search Methods

#### Search Cases by Filing Date: **(Deprecated)**

The filing date on a case is when the case is filed with the court. It does not reflect the date when the case was added to the case management system.

**Please Note:** *This API has been deprecated and will no longer work after June 30, 2018. Instead, use the [new combined API method](#) documented in the section following this one.*

**URI:** [https://api.browardclerk.org/api/cases\\_filed.json?court\\_type\\_code=TM&date=2014-04-23,2014-04-25&page\\_number=1&case\\_type\\_code=TI,TC&case\\_disposition\\_code=open&auth\\_key=<Authentication Key>](https://api.browardclerk.org/api/cases_filed.json?court_type_code=TM&date=2014-04-23,2014-04-25&page_number=1&case_type_code=TI,TC&case_disposition_code=open&auth_key=<Authentication Key>)

#### Search Cases by Created Date: **(Deprecated)**

The create date on a case is when the case was added to the case management system. It does not reflect the date the case was filed with the court.

**Please Note:** *This API has been deprecated and will no longer work after June 30, 2018. Instead, use the [new combined API method](#) documented in the section following this one.*

**URI:** [https://api.browardclerk.org/api/cases\\_created.json?court\\_type\\_code=TM&date=2014-04-23,2014-04-25&page\\_number=1&case\\_type\\_code=TI,TC&case\\_disposition\\_code=open&auth\\_key=<Authentication Key>](https://api.browardclerk.org/api/cases_created.json?court_type_code=TM&date=2014-04-23,2014-04-25&page_number=1&case_type_code=TI,TC&case_disposition_code=open&auth_key=<Authentication Key>)

#### URI Parameters:

Query string parameters are appended to a basic URI to specify the desired set of actors and/or cases the customer is interested in receiving. We currently support the following query string parameters:

#### Mandatory Parameters

Mandatory parameters are those whose values are required with the request.

Name	Description	Examples	Accepted Values
auth_key	(Required as a parameter in the query string for GET methods, Sent as part of the header for POST	auth_key=GKtDnJHxz3EyIrsuwxzLuzs	Alphanumeric value

	<p>methods)                  The API Authentication key is a required parameter for each request. The key should be exactly matching with one of the many keys assigned to the user account. It can be managed from the clerk's website online account. Remember, it is case sensitive.</p>		
court_type_code	<p>(Required)                  A short code (typically two letters long) that indicates court type.</p>	court_type_code=TM	See the <a href="#">glossary</a>
date	<p>(Required)                  The date when a case is filed with the court. It can be a single date or a comma separate set of 2 dates. If it is a single date, it means cases filed on that date. If it is the latter case, it means cases filed on or after the first date and on or before the second date. If doing a date range the range cannot exceed 31 days.</p>	<p>date=2009-11-23                  OR                  date=2009-09-01,2009-09-30</p>	YYYY-MM-DD

Dates: All dates must be in ISO format, YYYY-MM-DD. A single date can be specified, or a range of dates may be specified with a comma to separate the start and end dates of the range.

### Optional Parameters

Values for some parameters are not required to be passed in the query string, although name of the parameter must be there. You can specify the value to filter more accurately; otherwise, a default value will be sued for that particular parameter.

Name	Description	Examples	Accepted Values
page_number	<p>(Optional for page 1)                  The numeric page from which to begin returning records. Results are limited to 200 items. The page parameter gets the next</p>	page_number=2	Numeric value. Default value is 1.

	set of records for the same search. Default offset is 1.		
case_type_code	(Optional) A comma-separated value of short codes (typically two letters long) that indicates case type.	case_type_code=TI,TC	See the <a href="#">glossary</a>
case_disposition_code	(Optional) A value that indicates the status of the case.	case_disposition_code=closed	“open” or “closed”

**Note:** The new API method below will be replacing the deprecated API methods “cases\_filed” and “cases\_created” (from above). Please modify your programs to begin using this combined API. It has a new parameter “date\_to\_use” (highlighted in yellow below) that specifies which date to search by (either filing date or create date). Additionally, the date may now include TimeStamps (highlighted in teal below) in the search range when searching by create date. To learn more about the TimeStamps parameter, see the parameter documentation below.

**Search Cases by Created Date or by Filing Date: (Replacement)**

The **filing date** on a case is when the case is filed with the court. It does not reflect the date when the case was added to the case management system.

**URI:** (Search by filing date.)

[https://api.browardclerk.org/api/search\\_cases\\_filed.json?court\\_type\\_code=TM&date\\_to\\_use=filed&date=2014-04-23,2014-04-25&page\\_number=1&case\\_type\\_code=TI,TC&case\\_disposition\\_code=open&auth\\_key=<Authentication Key>](https://api.browardclerk.org/api/search_cases_filed.json?court_type_code=TM&date_to_use=filed&date=2014-04-23,2014-04-25&page_number=1&case_type_code=TI,TC&case_disposition_code=open&auth_key=<Authentication Key>)

The **create date** on a case is when the case was added to the case management system. It does not reflect the date the case was filed with the court.

**URI:** (Search by create date with optional Timestamp parameters.)

[https://api.browardclerk.org/api/search\\_cases\\_filed.json?court\\_type\\_code=TM&date\\_to\\_use=created&date=2014-04-23T01:00:00,2014-04-23T14:00:00&page\\_number=1&case\\_type\\_code=TI,TC&case\\_disposition\\_code=open&auth\\_key=<Authentication Key>](https://api.browardclerk.org/api/search_cases_filed.json?court_type_code=TM&date_to_use=created&date=2014-04-23T01:00:00,2014-04-23T14:00:00&page_number=1&case_type_code=TI,TC&case_disposition_code=open&auth_key=<Authentication Key>)

URI Parameters:

Query string parameters are appended to a basic URI to specify the desired set of actors and/or cases the customer is interested in receiving. We currently support the following query string parameters:

**Mandatory Parameters**

Mandatory parameters are those whose values are required with the request.

Name	Description	Examples	Accepted Values
auth_key	<b>(Required</b> as a parameter in the query string for GET methods, Sent as part of the header for POST methods) The API Authentication key is a required parameter for each request. The key should be exactly matching with one	auth_key=GKtDnJHzx3EyIrsuwxzLuzs	Alphanumeric value

	of the many keys assigned to the user account. It can be managed from the clerk's website online account. Remember, it is case sensitive.		
court_type_code	<b>(Required)</b> A short code (typically two letters long) that indicates court type.	court_type_code=TM	See the <a href="#">glossary</a>
date_to_use	<b>(Required)</b> The date type to search for (either filing date or create date).	date_to_use=filed or date_to_use=created	"filed" or "created" only.
date	<b>(Required)</b> The date when a case is filed with the court. It can be a single date or a comma separate set of 2 dates. If it is a single date, it means cases filed on that date. If it is the latter case, it means cases filed on or after the first date and on or before the second date. If doing a date range the range cannot exceed 31 days.  When searching by date with timestamp, the timestamp hours are on a 24 hour	Date Only: date=2009-11-23  OR date=2009-09-01,2009-09-30  With Timestamp: date=2009-09-01T01:00:00,2009-09-30T14:00:00	yyyy-mm-dd  or yyyy-mm-ddThh:mm:ss  Timestamp may only be used when searching by created date.  The "T" in the date indicates that it is a timestamp.  A colon ":" should be used between the hours,

		clock. The hours start at 00 to indicate midnight and go up to 23 to indicate 11pm.		minutes and seconds.
<b>Mutually Exclusive - 1 is Required</b>	case_type_code	<b>(Mutually Exclusive – 1 is Required)</b> A comma-separated value of short codes (typically two letters long) that indicates case type.	case_type_code=TI,TC or case_type_code=All (Note: Specify “case_type_code=All” if you want to search all case_type_code types based on the court_type_code you pass.)	See the <a href="#">glossary</a>  Note: Make sure the case_type_code you pass matches the court_type_code you pass.
	attorney_bar_number	<b>(Mutually Exclusive – 1 is Required)</b> A valid Florida Bar Number.	attorney_bar_number=12345	Florida Bar Number.

Dates: All dates must be in ISO format, yyyy-mm-dd or yyyy-mm-ddThh:mm:ss. A single date can be specified, or a range of dates may be specified with a comma to separate the start and end dates of the range. The Timestamp may only be used when searching by “created” date.

### Optional Parameters

Values for some parameters are not required to be passed in the query string, although name of the parameter must be there. You can specify the value to filter more accurately; otherwise, a default value will be used for that particular parameter.

Name	Description	Examples	Accepted Values
page_number	<b>(Optional for page 1)</b> The numeric page from which to begin returning records. Results are limited to 200 items. The page parameter gets the next set of records for the same search. Default offset is 1.	page_number=2	Numeric value. Default value is 1.

case_disposition_code	<b>(Optional)</b> A value that indicates the status of the case. If excluded, all case dispositions will be searched.	case_disposition_code=closed	“open” or ‘closed”
-----------------------	--------------------------------------------------------------------------------------------------------------------------	------------------------------	--------------------

**Search Cases by Party Name: (New)**

**URI:** [https://api.browardclerk.org/api/search\\_party\\_name.json?person\\_name=smith,john&birth\\_date=1970-02-17&court\\_type\\_code=TM&party\\_type\\_code=DF&file\\_date=2014-04-23,2014-04-25&case\\_type\\_code=TI,TC&case\\_disposition\\_code=open&page\\_number=1&auth\\_key=<Authentication Key>](https://api.browardclerk.org/api/search_party_name.json?person_name=smith,john&birth_date=1970-02-17&court_type_code=TM&party_type_code=DF&file_date=2014-04-23,2014-04-25&case_type_code=TI,TC&case_disposition_code=open&page_number=1&auth_key=<Authentication Key>)

## URI Parameters:

Query string parameters are appended to a basic URI to specify the desired set of parties and/or cases the customer is interested in receiving. There are both required and optional parameters. Some parameters have additional conditions.

We currently support the following query string parameters:

	Name	Description	Examples	Accepted Values
Mutually Exclusive)	person_name	<b>(Required)</b> Search by either a person name or a business name. Person names can be searched by last, first and middle (optional) names separated by a comma. Partial name searches are allowed by adding the * (wildcard) symbol at the end of the name element.	Exact person's name using only the last and first name. person_name=smith,john  OR Exact person's name using last, first and middle name. person_name=smith,john,thomas  OR Partial person's name using last, first names. person_name=smith*,john*	Alphanumeric value  <b>Please Note:</b> We expect the person_name in the format shown below.  person_name=last name, first name,middle name  The order matters here.  Also, when searching by person_name, at least a last name and first name are required to perform the search.
	business_name	Rules for partial name searches:  <i>person_name</i> requires a minimum of 1 letter for last name, 1 letter for first name and 1 letter for middle name.  <i>business_name</i> requires a minimum of 1 letter.	Exact business name. business_name=alamo  OR Partial business name. business_name=ala*	Alphanumeric value

birth_date	(Optional – Only when person_name is used) Date of birth. Birth date can be searched by date range if you do not know the exact date.	Exact birth date birth_date =2009-11-23  OR  Looking for the birth dates in September 2009 birth_date=2009-09-01,2009-09-30  OR  Looking for the birth dates in the year 2009 birth_date=2009-01-01,2009-12-31	YYYY-MM-DD
court_type_code	(Optional) A short code (typically two letters long) that indicates court type. If used only 1 court type can be used for each call. If not used, then the default will search across all court types listed on the right.	court_type_code=TM	FEL=Felony TM=Traffic/Misdemeanor CR=Criminal Appeals FAM=Family CV=Civil PR=Probate  If omitted, all court types above will be searched.
case_type_code	(Optional - Only when court_type_code is used) A comma-separated value of short codes (typically two letters long) that indicates case type.	case_type_code=TI,TC	See Case Types in the <a href="#">glossary</a>
party_type_code	(Optional - Only when court_type_code is used) Party type on case. Examples: Defendant, Plaintiff, etc.	party_type_code=DF	See Party Types in the <a href="#">glossary</a>
case_disposition_code	(Optional) A value that indicates the status of the case is “open” or	case_disposition_code=closed	“open” or “closed”

	<p>“closed”. When omitted, both “open” and “closed” cases are searched.</p>		
file_date	<p><b>(Optional)</b> The date when a case is filed with the court. It can be a single date or a comma separate set of 2 dates. If it is a single date, it means cases filed on that date. If it is the latter case, it means cases filed on or after the first date and on or before the second date. If doing a date range the range cannot exceed 365 days.</p>	<p>file_date =2009-11-23 OR file_date =2009-09-01,2009-09-30</p>	<p>YYYY-MM-DD</p>
page_number	<p><b>(Optional)</b> for page 1) The numeric page from which to begin returning records. Results are limited to 200 items. The page parameter gets the next set of records for the same search. Default offset is 1.</p>	<p>page_number=2</p>	<p>If omitted, the default value is 1.</p>
auth_key	<p><b>(Required)</b> as a parameter in the query string for GET methods, Sent as part of the header for POST methods) The API Authentication key is a required parameter for each request. The key should</p>	<p>auth_key=[Your Auth Key]</p>	<p>Alphanumeric value</p>

	be exactly matching with one of the many keys assigned to the user account. It can be managed from the clerk's website online account. Note: this value is case sensitive.

**Search Cases by Number: (New)**

Searching by **case number** or **citation number** alone is the most efficient way to find a case. However, if you know any of the following cross reference numbers, you may also search by it as well.

- **UCN** - Uniform Case Number
- **BCCN** - Broward County Control Number
- **NTA** - Notice to Appear Number
- **BSO** - Broward Sheriff Office Arrest Number
- **SAO** - State Attorney Office Booking Number

You may search for up to 200 specific numbers (based on the number search type) at once. Separate multiple numbers by a comma.

**URI:**

[https://api.browardclerk.org/api/search\\_number.json?case\\_number=13004090CF10A,13004091CF10A,13004092CF10A&page\\_number=1&auth\\_key=<Authentication Key>](https://api.browardclerk.org/api/search_number.json?case_number=13004090CF10A,13004091CF10A,13004092CF10A&page_number=1&auth_key=<Authentication Key>)

URI Parameters:

Query string parameters are appended to a basic URI to specify the desired set of actors and/or cases the customer is interested in receiving. We currently support the following query string parameters:

**Mandatory Parameters**

Mandatory parameters are those whose values are required with the request.

Name	Description	Examples	Accepted Values
auth_key	<b>(Required</b> as a parameter in the query string for GET methods, Sent as part of the header for POST methods) The API Authentication key is a required parameter for each	auth_key=GKtDnJHzx3EyIrsuwxzLuzs	Alphanumeric value

		request. The key should be exactly matching with one of the many keys assigned to the user account. It can be managed from the clerk's website online account. Remember, it is case sensitive.	
<b>Mutually Exclusive - 1 is Required</b>	case_number	<b>(Mutually Exclusive – 1 is Required)</b> Search by case number.	case_number=13004090CF10A case_number=13004090CF10A,13004091CF10A,13004092CF10A
	citation_number	<b>(Mutually Exclusive – 1 is Required)</b> Search by citation number.	citation_number= A3SFZKE citation_number=A3SFZKE,A4E70VE,A4C7Q9E
	uniform_case_number	<b>(Mutually Exclusive – 1 is Required)</b> Search by UCN number.	uniform_case_number=062013CF004091A88810 uniform_case_number=062013CF004091A88810,062013CF004092A88810
	broward_county_control_number	<b>(Mutually Exclusive – 1 is Required)</b>	broward_county_control_number=0192754 broward_county_control_number=0192754,0819049

		Search by BCCN number.		
notice_to_appear_number	(Mutually Exclusive – 1 is Required)	Search by NTA number.	notice_to_appear_number= V354725 notice_to_appear_number= V354725,V354825	Alphanumeric value
broward_sheriff_office_arrest_number	(Mutually Exclusive – 1 is Required)	Search by BSO number.	broward_sheriff_office_arrest_number= DR13000389 broward_sheriff_office_arrest_number= DR13000389,DR13000391	Alphanumeric value
state_attorney_office_booking_number	(Mutually Exclusive – 1 is Required)	Search by SAO number.	state_attorney_office_booking_number= 2294906 state_attorney_office_booking_number= 2294906,2293113D	Alphanumeric value

**Note:** You may search for up to 200 specific numbers at one time. Separate each number with a comma. Also, you cannot combine different number types within the same search.

### Optional Parameters

Values for some parameters are not required to be passed in the query string, although name of the parameter must be there. You can specify the value to filter more accurately; otherwise, a default value will be used for that particular parameter.

Name	Description	Examples	Accepted Values
page_number	(Optional for page 1) The numeric page from which to begin returning records. Results are limited to 200 items. The page parameter gets the	page_number=2	Numeric value. Default value is 1.

	next set of records for the same search. Default offset is 1.

**Search Cases by Party ID: (New)**

**URI:** [https://api.browardclerk.org/api/search\\_party\\_id.json?judge\\_code=HO&court\\_type\\_code=TM&date=2014-04-23,2014-04-25&page\\_number=1&auth\\_key=<Authentication Key>](https://api.browardclerk.org/api/search_party_id.json?judge_code=HO&court_type_code=TM&date=2014-04-23,2014-04-25&page_number=1&auth_key=<Authentication Key>)

URI Parameters:

Query string parameters are appended to a basic URI to specify the desired set of actors and/or cases the customer is interested in receiving. We currently support the following query string parameters:

**Mandatory Parameters**

Mandatory parameters are those whose values are required with the request.

<b>Name</b>	<b>Description</b>	<b>Examples</b>	<b>Accepted Values</b>
auth_key	<b>(Required)</b> as a parameter in the query string for GET methods, Sent as part of the header for POST methods) The API Authentication key is a required parameter for each request. The key should be exactly matching with one of the many keys assigned to the user account. It can be managed from the clerk's website online account. Remember, it is case sensitive.	auth_key=GKtDnJHzx3EyIrsuwxzLuzs	Alphanumeric value
court_type_code	<b>(Required)</b> A short code (typically two letters long) that indicates court type.	court_type_code=TM	See the <a href="#">glossary</a>
date	<b>(Required)</b> The date when a	Date Only: date=2009-11-23	yyyy-mm-dd

	hearing is held with the court. It can be a single date or a comma separate set of 2 dates. If it is a single date, it means hearings on that date. If it is the latter case, it means hearings on or after the first date and on or before the second date. If doing a date range the range cannot exceed 31 days.	OR date=2009-09-01,2009-09-30		
<b>Mutually Exclusive - 1 is Required</b>	judge_code	<b>(Mutually Exclusive - 1 is Required)</b> A comma-separated value of short codes that indicates the judge codes to search.	judge_code=BXB,BXL or judge_code=All (Note: Specify “judge_code=All” if you want to search all judge_code types based on the court_type_code you pass.)	See the <a href="#">glossary</a>  Note: Make sure the judge_code you pass matches the court_type_code you pass.
	magistrate_code	<b>(Mutually Exclusive - 1 is Required)</b> A comma-separated value of short codes that indicates the magistrate codes to search.	magistrate_code=68G,69G or magistrate_code=All (Note: Specify “magistrate_code=All” if you want to search all magistrate_code types based on the court_type_code you pass.)	See the <a href="#">glossary</a>  Note: Make sure the magistrate_code you pass matches the court_type_code you pass.
	attorney_bar_number	<b>(Mutually Exclusive - 1 is Required)</b> Search by a valid Florida Bar Number.	attorney_bar_number=12345	Florida Bar Number.
	broward_county_control_number	<b>(Mutually Exclusive - 1 is Required)</b> Search by BCCN Number.	broward_county_control_number=12345	Numeric value

Dates: All dates must be in ISO format, yyyy-mm-dd. A single date can be specified, or a range of dates may be specified with a comma to separate the start and end dates of the range.

### Optional Parameters

Values for some parameters are not required to be passed in the query string, although name of the parameter must be there. You can specify the value to filter more accurately; otherwise, a default value will be used for that particular parameter.

Name	Description	Examples	Accepted Values
page_number	(Optional for page 1) The numeric page from which to begin returning records. Results are limited to 200 items. The page parameter gets the next set of records for the same search. Default offset is 1.	page_number=2	Numeric value. Default value is 1.

**Search Cases by Disposition: (New)****URI:**

[https://api.browardclerk.org/api/search\\_disposition.json?disposition\\_code=AJJ,AJN,AJR,AJT&court\\_type\\_code=TM&date=2014-04-23,2014-04-25&page\\_number=1&auth\\_key=<Authentication Key>](https://api.browardclerk.org/api/search_disposition.json?disposition_code=AJJ,AJN,AJR,AJT&court_type_code=TM&date=2014-04-23,2014-04-25&page_number=1&auth_key=<Authentication Key>)

URI Parameters:

Query string parameters are appended to a basic URI to specify the desired set of actors and/or cases the customer is interested in receiving. We currently support the following query string parameters:

**Mandatory Parameters**

Mandatory parameters are those whose values are required with the request.

<b>Name</b>	<b>Description</b>	<b>Examples</b>	<b>Accepted Values</b>
auth_key	<b>(Required)</b> as a parameter in the query string for GET methods, Sent as part of the header for POST methods) The API Authentication key is a required parameter for each request. The key should be exactly matching with one of the many keys assigned to the user account. It can be managed from the clerk's website online account. Remember, it is case sensitive.	auth_key=GKtDnJHzx3EyIrsuwxzLuzs	Alphanumeric value
court_type_code	<b>(Required)</b> A short code (typically two letters long) that indicates court type.	court_type_code=TM	See the <a href="#">glossary</a>
date	<b>(Required)</b>	Date Only:	yyyy-mm-dd

		The date when a hearing is held with the court. It can be a single date or a comma separate set of 2 dates. If it is a single date, it means hearings on that date. If it is the latter case, it means hearings on or after the first date and on or before the second date. If doing a date range the range cannot exceed 31 days.	date=2009-11-23 OR date=2009-09-01,2009-09-30	
<b>Mutually Exclusive - 1 is Required</b>	disposition_code	<b>(Mutually Exclusive - 1 is Required)</b> A comma-separated value of short codes that indicates the disposition codes to search.	disposition_code=AJJ,AJN,AJR,AJT or disposition_code=All (Note: Specify "disposition_code=All" if you want to search all disposition_code types based on the court_type_code you pass.)	See the <a href="#">glossary</a>  Note: Make sure the disposition_code you pass matches the court_type_code you pass.
	attorney_bar_number	<b>(Mutually Exclusive - 1 is Required)</b> A valid Florida Bar Number.	attorney_bar_number=12345	Florida Bar Number.

Dates: All dates must be in ISO format, yyyy-mm-dd. A single date can be specified, or a range of dates may be specified with a comma to separate the start and end dates of the range.

### Optional Parameters

Values for some parameters are not required to be passed in the query string, although name of the parameter must be there. You can specify the value to filter more accurately; otherwise, a default value will be used for that particular parameter.

Name	Description	Examples	Accepted Values
page_number	<b>(Optional for page 1)</b> The numeric page from which to begin	page_number=2	Numeric value. Default value is 1.

	returning records. Results are limited to 200 items. The page parameter gets the next set of records for the same search. Default offset is 1.		
case_disposition_code	<b>(Optional)</b> A value that indicates the status of the case. If excluded, all case dispositions will be searched.	case_disposition_code=closed	“open” or ‘closed”

### Sample Result (showing only 2 results for sample):

## **Case Detail Methods:**

After you search a case or a list of cases, next desirable thing would be the details of those cases. Below are the sample formats of requests and responses along with various required and optional parameters for different sections of Case Detail.

### **URI Parameters (Common for all the Case detail Sections):**

Query string parameters are appended to a basic URI to specify the desired set of actors and/or cases the customer is interested in receiving. We currently support the following query string parameters:

#### Mandatory Parameters

Mandatory parameters are those whose values are required with the request.

<b>Name</b>	<b>Description</b>	<b>Examples</b>	<b>Accepted Values</b>
auth_key	The API Authentication key is a required parameter for each request. The key should be exactly matching with one of the many keys assigned to the user account. It can be managed from the clerk's website online account. Remember, it is case sensitive.	auth_key =GktDnJHzx3EyIrsuwxzLuzs	Alphanumeric value

**Case Information:**

URI: [https://api.browardclerk.org/api/case/<case\\_number>/case.json?auth\\_key=<value>](https://api.browardclerk.org/api/case/<case_number>/case.json?auth_key=<value>)

Note: [CASE NUMBER] should be replaced by the actually case number.

Example: [https://api.browardclerk.org/api/case/09000333CF10A/case.json?auth\\_key=<value>](https://api.browardclerk.org/api/case/09000333CF10A/case.json?auth_key=<value>)

**Sample Result:**

```
{
  Case_Number: "09000333CF10A",

## Code Glossary

### Get Court and Case Types:

For all the court types and the corresponding case types, you can refer to the following URL. You don't need any parameters for this and this call would be free of charge:

URI: <http://api.browardclerk.org/api/case/CaseTypes.json>

### Sample Result:

```
[
  {
    "CourtTypeCode": "CV",
    "CourtTypeDesc": "Civil",
    "CaseTypeCode": "PLI",
    "CaseTypeDesc": "Products Liability"
  },
  {
    "CourtTypeCode": "CV",
    "CourtTypeDesc": "Civil",
    "CaseTypeCode": "PIPNF",
    "CaseTypeDesc": "PIP Transfer Case"
  },
  {
    "CourtTypeCode": "CV",
    "CourtTypeDesc": "Civil",
    "CaseTypeCode": "ANEG",
    "CaseTypeDesc": "Auto Negligence"
  },
  {
    "CourtTypeCode": "CV",
    "CourtTypeDesc": "Civil",
    "CaseTypeCode": "CACT",
    "CaseTypeDesc": "Condominium Action"
  }
]
```

**Get Party Types:**

For all the court types and the corresponding party types, you can refer to the following URL. You don't need any parameters for this and this call would be free of charge:

**URI:** <http://api.browardclerk.org/api/case/PartyTypes.json>

**Sample Result:**

```
[
  {
    "CourtTypeCode": "CR",
    "CourtTypeDesc": "Criminal Appeals",
    "PartyTypeCode": "AT",
    "PartyTypeDesc": "Attorney"
  },
  {
    "CourtTypeCode": "CR",
